Throttle Valves

Manual restrictions in irrigation head controls, field plots, Nutrigation™ systems, filtration heads systems.

Benefits & Features

Saves operation costs

User-friendly design allows smooth handle operation

- Saves labor costs and multiple investments in maintenance
- Highly reliable operation and durable over time
- Chemical/corrosion resistant, UV stabilized

Specifications & Recommendations

- Multi-turn, vertical motion
- Straight throughflow with minimal head loss
- Visual float position indicator to show % throttle of piping system
- Slow operation pavement water hammer
- Maintaining seat leakage permissible limit as per Standard ANSI/FCI-70-2-2006 in class III (0.10%)
- Operational up to 6bar
- Threaded connections (BSP or NPT standards)
